Professional Summary

Aphiwe is a seasoned **IT Project Manager and Business Analyst with over five years of demonstrated expertise** in leading complex systems implementation, software deployment, and enterprise integration initiatives across diverse industries. Adept at leveraging both Agile and Waterfall methodologies, I excel in translating business requirements into functional solutions, managing cross-functional teams, and ensuring projects are delivered on time, within scope, and on budget. With a strong technical foundation in web development, API integration, and cloud platforms, she consistently drives successful digital transformations while maintaining rigorous governance, risk management, and stakeholder alignment.

Currently serving as an IT Project Manager and Key Account Manager at Trillion Cart Investments, I combine strategic account leadership with hands-on project delivery, managing everything from e-commerce platforms and mobile applications to LMS implementations and fiber infrastructure rollouts. Skilled in end-to-end project lifecycle management, she is proficient in tools such as Jira, Asana, and MS Project, and excels in stakeholder communication, KPI reporting, and team coordination. With additional experience in web development, social media campaign management, and team supervision, she brings a versatile and results-driven approach to every engagement, ensuring measurable outcomes and sustained client satisfaction

Key Skills

Project Management:

- Agile, Waterfall, Hybrid Delivery, Project Planning, Resource Allocation, Risk Management, Change Control, Budget Tracking, Scope & Timeline Management, UAT, Sprint Planning, Systems Implementation.

Technical & Tools:

- Jira, Asana, MS Project, Smartsheets, Microsoft 365, Figma, API Integration, Git/GitHub, Basic Cloud/Infrastructure Awareness.

Business Analysis:

- Requirements Gathering, Process Mapping, Functional Specifications, Business Modeling, Stakeholder Workshops, Solution Analysis.

Reporting & Analysis:

- KPI Reporting, Dashboard Creation, Progress Tracking, Status Reports, Data Analysis.

Leadership & Communication:

- Team Coordination, Cross-functional Collaboration, Training & Onboarding, Client Communication, Conflict Resolution.
-

Trillion Cart Investments / IT Project Manager & Junior Business Analyst

March 2021 - PRESENT, Marshalltown, Johannesburg, SA

- Lead systems implementation and software deployment initiatives across multiple business units, ensuring alignment with programme objectives and operational requirements.
- Lead the end-to-end delivery of IT projects, from initiation to closure, including medium to large-scale projects within scope, budget, and timelines.
- Translate client and internal business needs into functional specifications, delivery plans, and implementation frameworks.
- Plan requirements gathering, design, development, testing, and deployment; coordinate with developers, designers, QA, and cross-functional teams to Maintain clear responsibilities and seamless integration.
- Develop detailed project plans, timelines, budgets, and resource allocations.
- Define project scope, objectives, and deliverables aligned to organisational goals.
- Manage timelines, budgets, risks, dependencies, and quality standards while ensuring compliance with governance processes and documentation requirements.
- Maintain project documentation, governance, and reporting standards are adhered to.
- Oversee proof of concept phases, pilot rollouts, and staged deployments, incorporating feedback into final releases.

Stakeholder & Client Management

- Engage with technical and business stakeholders to gather requirements.
- Facilitate communication between development teams, vendors, and business units.
- Provide stakeholder updates through structured reports, progress dashboards, and risk mitigation plans.
- Influence and manage expectations to Maintain alignment throughout the project lifecycle.
- Facilitate end-user and client training sessions to support adoption readiness and smooth platform transitions.
- Support client escalations, technical assessments, and issue resolution through collaboration with internal teams.

Team Leadership

- Lead and motivate project teams, ensuring clear roles, responsibilities, and expectations.
- Conduct project meetings, sprint reviews, and team check-ins.
- Collaborate closely with architects, developers, testers, and operational teams.

Technical & Delivery Expertise

- Analyse technical requirements and Maintain solution alignment with architecture standards.
- Oversee software development, infrastructure, systems integration, or cloud projects.
- Manage vendor relationships and Maintain contractual deliverables are met.
- Support UAT, QA processes, and production deployments.

Project Governance

- Maintain compliance with PMO methodologies (Waterfall, Agile, Hybrid).
- Drive continuous improvement of project delivery processes.
- Prepare project documentation including business cases, project charters, and post-implementation reviews.

Systems Implementation and Software Deployment

- Led planning, scheduling, and delivery of multiple digital systems including an e-commerce platform, LMS, appointment management system, and online auction platform.
- Managed full SDLC, Agile sprints, UAT cycles, and implementation rollouts.
- Oversaw proof of concept builds and pilot testing, ensuring smooth transition to production.
- Coordinated cross functional teams including IT, operations, vendors, and technical support.
- Facilitated end user training and adoption for newly deployed systems.

Technical Coordination

- Managed API integration for mobile apps, websites, payment gateways, and cross platform systems.
 - Directed satellite to home Wi Fi configuration and fiber installation coordination with network operators.
 - Developed project plans, risk mitigation strategies, and technical documentation.
-

Key Projects

E-commerce Platform Development

- Led project planning, requirement gathering, and delivery of an online store.
- Managed timeline, UAT, KPIs, and stakeholder reporting.

Learning Management System (LMS) Implementation

- Managed Agile/Scrum sprints, conducted sprint planning and daily stand-ups.
- Integrated SCORM/xAPI, conducted training, and oversaw testing and vendor coordination.
- Delivered stakeholder reporting and led product migration across platforms.

Appointment & Ticket Management System

- Defined scope, tracked deliverables, and facilitated adoption.
- Created detailed project reports, documentation, and implementation tracking.

Wi-Fi Configuration Rollout

- Directed setup of satellite-to-home Wi-Fi services.
- Oversaw logistics, approvals, risk mitigation, and developed detailed project plans.
- Coordinated technical teams, managed hardware/software support, and identified project risks with mitigation plans.

Funeral Home Member Portal (Mobile App)

- Led UI/UX, app testing, and system integration.
- Implemented solution enhancing user engagement and satisfaction.
- Launched on time with 95% user satisfaction.

ICOM Mobile App Development

- Oversaw infrastructure setup and software implementation.
- Integrated payment gateway, tracked budgets, led reporting, and delivered ongoing end-user training.
- Maintained SLAs and coordinated with vendors.

Online Auction Platform

- Managed UI/UX, QA, deployment, and SLA-based stakeholder updates.
- Created documentation and coordinated API connectivity for auction listings.
- Led QA and testing to Maintain system integrity before deployment.

Fiber Installation Coordination

- Coordinated end-to-end fiber installation projects including inspections, fiber ordering, and installation planning with FNOs.
- Managed procurement, vendor coordination, and Maintained SLA compliance.
- Supervised a team of ten coordinators.

Church Mobile App

- Coordinated development and app team.
- Delivered on scope, timeline, and budget.
- Supported migration of user data and configured platform APIs.

January 2019 - February 2021, Marshalltown, Johannesburg, SA

- Developed responsive websites, configured analytics, and collaborated with cross functional teams.
 - Conducted technical troubleshooting and Maintained site performance and security.
-

Education

Completed 2025: Agile Project Management Certification

Institution: **Udemy**

Johannesburg

Completed practical training covering Agile principles, Scrum framework, sprint planning, backlog management, and Jira usage for task tracking and project workflow management.

Completed 2025: In Full Stack Development.

Institution: **FNB App Academy**

Johannesburg

Completed practical training in front end and back end development, focusing on web technologies, coding best practices, and building functional applications from design to deployment.

Completed 2025: Certificate: Introducing Generative AI

Institution: **AWS -Udacity**

Johannesburg

Completed foundational training on generative AI concepts, machine learning basics, responsible AI practices, and practical applications of AI tools in real projects.

Completed 2018: Certificate Oracle Certified Associate, Java SE 8 Programmer

Institution: **Graduate Institute of South Africa (GISA)**

Johannesburg

Completed competency training in Java programming, object oriented concepts, data structures, and core Java development required for building reliable and efficient applications.

Completed 2015: Information Technology - System Development (NQF Level 4 & 5)

Institution: **Jeppe College of Commerce & Computer Studies**

Pretoria

Completed structured training in system development, software fundamentals, programming logic, database design, networking basics, and practical IT support skills.

Completed 2016: Diploma: Information and communication Technology (ICT) Professional Competence

Institution: **Jeppe College of Commerce & Computer Studies**

Pretoria

Completed comprehensive training in IT systems, software development fundamentals, networking concepts, database management, and practical problem solving within IT environments.

Proudest Project

Led the development of an e-commerce platform for three companies, transforming manual sales, inventory, and delivery processes into a fully integrated online system with secure payment gateways, streamlining operations and reducing errors.
